

2009 Flu season is starting. Get ready now!

The flu season is starting and will last through the fall and winter. More than one kind of flu virus will be spreading this season, including seasonal flu and the 2009 H1N1 flu. If you get the flu, you can get sick and can spread the flu to others at home, at work, and in the community. Symptoms of flu include fever or chills *and* cough or sore throat. In addition, symptoms of flu can include runny nose, body aches, headache, tiredness, diarrhea, or vomiting.

If you think that you have the flu, tell your Supervisor and stay home, except to get medical care.

Also remember to cover your coughs and sneezes and wash your hands often with soap and water. Use an alcohol-based hand cleaner if soap and water are not available. If a severe flu outbreak hits our community, we will take additional steps to avoid spreading the flu virus in the workplace.

You need to prepare as well.

- Get the vaccine for seasonal flu.
<http://www.dsf.health.state.pa.us/health/cwp/view.asp?a=178&q=235462>
- Get the 2009 H1N1 flu vaccine when it becomes available, **if** you are at higher risk for 2009 H1N1 flu complications. People at higher risk for 2009 H1N1 flu complications include pregnant women and people with chronic medical conditions (such as asthma, heart disease, or diabetes). For more information about priority groups for vaccination, visit www.cdc.gov/h1n1flu/vaccination/acip.htm.
- Make plans to care for sick household members or for children if schools dismiss students or child care programs close.
- Be prepared in case you get sick and need to stay home. Have the following items on hand: a supply of fever-reducing medicines that contain acetaminophen or ibuprofen, alcohol-based hand cleaners, tissues, and other items that may be useful and help avoid the need to make trips out in public while you are sick.
- Learn about the flu and what you can do. To find out more about preparing for the flu, go to www.flu.gov or call 1-800-CDC-INFO (1-800-232-4636).

By working together, we can protect our workforce while having a productive fall and winter.
